excerpt from structural linguistics this set of structural methods for descriptive linguistics is intended both for students of linguistics and for persons who may be interested in the character of linguistics as science for those who use linguistic methods in research or teaching the techniques are given here in some detail without employing the terminology of logic for those who are primarily interested in the logic of distributional relations which constitutes the basic method of structural linguistics a minimum of knowledge about language and linguistics has been assumed here chapters 1 2 and 20 deal with the general character of linguistic methods this book is regrettably not easy to read a single reading should be enough for a picture of the operations and elements of linguistics but anyone who wants to use these methods or to control them critically will have to work over the material with paper and pencil reorganizing for himself the examples and general statements presented here the procedures of analysis discussed here are the product and outgrowth of the work of linguists throughout the world to whose investigations the meager references cited here are an inadequate guide this book owes most however to the work and friendship of edward sapir and of leonard bloomfield and particularly to the latter s book language in preparing this book for publication i had the benefit of many discussions with c f voegelin and rulon s wells iii and of important criticisms from roman jakobson w d preston and fred lukoff n chomsky has given much needed assistance with the manuscript about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

the point of departure of this general survey of modern structural linguistics is the place of language in human relations linguistics will consequently be understood as a science of communication my book is not intended as an elementary handbook the readers are supposed to be in the first place advanced students of linguistics and phonetics and of neighbouring fields where a real awareness of linguistic methods and problems is essential such as psychology phoniatrics speech therapy language teaching communication engineering the book may however be of some value also for the general reader who is interested in language in language learning or in communication processes it might finally serve as an introduction to structural theories and practice for those linguists of traditional orientation who would like to make contact with the new trends in the study of language it is self evident that under such circumstances any reader will find certain chapters in this book rather complicated others irritatingly elementary this is however unavoidable in a work whose aim is to cover a vast field of knowledge and to offer the reader a synthesis of what appears at first sight to be widely

disparate facts and phenomena many of the facts brought together here may regarded superficially seem to have few or no mutual connections they can nevertheless be combined into a wide humanistic and scientific unity within which numerous lines of relationship bind together physical and psychic individual and social phenomena

this book illustrates the structuralist idea that language creates the reality we perceive the data presented in this volume focus on the problematic issues of the passive construction and irregular strong verbs with examples taken primarily from english with separate subsections on german and russian the author presents a new and different analysis of these complex topics which proceeds from the levels of form to meaning rather than the traditional and generative methodologies that follow the opposite path from meaning to form this book will be of interest to all linguists who have ever confronted the controversial question of the interaction between lexical exceptions and grammatical rules the scope of this volume is rather broad and it compares and contrasts text grammar versus sentence grammar in an innovative way

this book identifies the romantic notion of the whole as the fundamental epistemological source of the notion of structure in the thinking of the prague linguistic circle primarily its russian representatives and studies what amounted to the slow painful process of disengagement from the organicist metaphor in an intellectual world very different from saussure s
