this book was the end product of life experiences thoughts and intellectual wanderings of the author who through his career and for the last twenty years was always serving all the three aspects of a psychiatrist he is a clinician a researcher and an academic teacher the book includes a comprehensive history of psychiatry since antiquity and until today with an emphasis not only on main events but also specifically and with much detail and explanations on the chain of events that led to a particular development at the center of this work is the question what is mental illness and does free will exist these are questions which tantalize psychiatrists neuroscientists psychologists philosophers patients and their families and the sensitive and educated lay persons alike thus the book includes a comprehensive review and systematic elaboration on the definition and the concept of mental illness a detailed discussion on the issue of free will as well as the state of the art of contemporary psychiatry and the socio political currents it has provoked finally the book includes a description of the academic social and professional status of psychiatry and psychiatrists and a view of future needs and possible developments a last moment addition was the chapter on conspiracy theories as a consequence of the experience with the social media and the public response to the covid 19 outbreak which coincided with the final stage of the preparation of the book their study is an excellent opportunity to dig deep into the relation among human psychology mental health the society and politics and to swim in intellectually dangerous waters

mad studies the basics provides an introductory account of a field that emerged from and must remain grounded within community knowledge activism and the perspectives of those who have experienced madness and mental health systems it is a concise text that introduces the field through an exploration of some origins of mad studies as well as two

interrelated queries what does mad studies help us understand and what does mad studies help us do this exploration reveals that mad studies is an interdisciplinary intersectional and multi vocal field that demands different answers to the very meaning of the beliefs behaviours and bodymind experiences that are currently characterized as being indicative of mental illness at the heart of mad studies is a liberationist desire to resist transform and abolish the systems that create marginalization and implement responses to madness that are grounded in the collective knowledge of those deemed mad this book shows that the contributions of indigenous black racialized queer and trans people must be understood as central to and already embedded within mad studies and activism rather than as add ons expansions or efforts to make mad studies more inclusive it will be of interest to all scholars and students of disability studies social work gender studies education health sciences sociology and psychology as well as practitioners in mental health care and those with lived experience of madness and mental health systems

covid 19 had an enormous impact on society around the globe by 5th march 2023 when the who officially declared the pandemic emergency over societies affected by it had been profoundly changed the covid 19 pandemic not only had medical consequences but also significant effects related to the mechanisms involved in its discursive construction as a phenomenon of wide significance in various social arenas reaching a highly polarized form public debate on compulsory vaccination against covid 19 constituted an essential component of mechanisms not only for stance taking for creating opportunities for self and other positioning and for covering discursive positions but also for subverting existing epistemic orders the present volume reconstructs this complex discursive phenomenon with examples from italy germany and the usa and invites critical reflections on the way societies around the globe have faced the extreme crisis sparked by the pandemic

over the past forty years the health humanities previously called the medical humanities has emerged as one of the most exciting fields for interdisciplinary scholarship advancing humanistic inquiry into bioethics human rights health care and the uses of technology it has also helped inspire medical practitioners to engage in deeper reflection about the human elements of their practice in health humanities reader editors therese jones delese wear and lester d friedman have assembled fifty four leading scholars educators artists and clinicians to survey the rich body of work that has already emerged from the field and to imagine fresh approaches to the health humanities in these original essays the collection s contributors reflect the extraordinary diversity of the field including scholars from the disciplines of disability studies history literature nursing religion narrative medicine philosophy bioethics medicine and the social sciences with warmth and humor critical acumen and ethical insight health humanities reader truly humanizes the field of medicine its accessible language and broad scope offers something for everyone from the experienced medical professional to a reader interested in health and illness

the catholic church is the world s largest non governmental provider of health care more than a quarter of all the health care facilities in the world are under catholic auspices those facilities however range from technologically sophisticated urban hospitals to small under resourced rural clinics pope francis has said health care is not a luxury it is for everyone but the gap between health care for those with means to pay and those without continues to widen this volume gathers scholars and practitioners from around the world to reflect on some of the most pressing challenges to catholic health care among some of the globe s most underserved people in addition to local narratives and analysis the volume also reflects dialogues between care providers in different parts of the global south and between practitioners in the global south and the global north the chapters in this volume question the missionary model of the rich north rescuing the poor south and show how a universal church can promote dialogue between western and non western medicine and traditions of care
